**Netop
Remote
Control
Portal User
Privileges
(EN)**

Netop Portal users have different access permissions based on their type. Each user must be classified by only one of the available types. **User** - view assigned devices and manage own profile **Group manager** - all the permissions of the User, plus the ability to manage

users and
 devices within
 assigned
 groups
Account

administrator
 can manage
 users,
 devices,
 groups, roles
