

Netop Remote Control - Amazon AppStream 2.0 Integration

Article Number: 461 | Last Updated: Mon, Oct 9, 2017 3:04 PM

Amazon AppStream 2.0 is an AWS service, which enables the streaming of desktop applications from AWS to any device running a web browser. The Netop Remote Control Guest can be set up as part of the service.

Benefits: **Running the native desktop application in the browser.** Users can get the feature set of the Windows based Guest directly from the browser . **Easier application management.** By serving to the user the application from the same place, you can always make sure that the application has the latest feature and security updates. **No data saved on users' devices.** Users always get a high-performance and secure experience Â
