

Upgrader's guide to Vision7

Are you an experienced Vision6 user wondering where to find your favorite Vision6 commands in the new Vision7 interface? Then this document is for you! Using little text and lots of pictures the goal of this document is to show you the location of the familiar Vision6 commands in Vision7.

COMMAND MAP

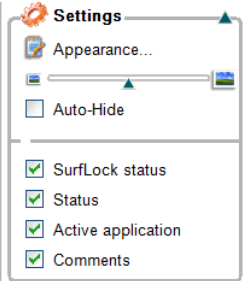

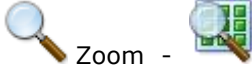

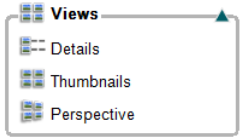

Below is a map between commands and icons in Vision6 and the corresponding ones in Vision7. The map lists the Vision6 commands in the order they appear on menu bar and on the Vision panel.

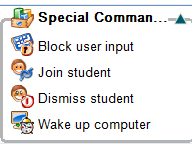

VISION6	VISION7	TAB	VISION7 TEACHER GUIDANCE NOTES
TOOLBAR			
 My Classroom	File tab	File	(no ScreenTips on tabs)
 Connect Classroom	 Connect	Administration	Connect with Classroom Computers Connect with all computers in the classroom and start teaching. Computer screens will be displayed as Thumbnails
 Disconnect Classroom	 Disconnect	Administration	Disconnect from Classroom Computers Disconnect from all computers in the classroom.
 Demo	 Demo	Home	Demonstrate on the Full Screen Show your desktop on the full screen of all computers in the classroom. Automatically disables the mouse and keyboard for computers in the classroom during the demonstration.
 Remote Control	 Remote Control	Home	Start Remote Control Take control of the selected computer and use keyboard and mouse as if you were sitting in front of the remote computer.
 Virtual Teacher	 Showcase Student	Home	Use a Student Computer to Demonstrate Show the desktop of the selected student computer on all computers in the classroom, including your own.
 Blank screen	 Blank Screen	Home	Lock Computers Disable mouse and keyboard and display a standard picture or a standard text on all computers in the classroom. Note: If one or more student computers are selected, only those computers are locked.

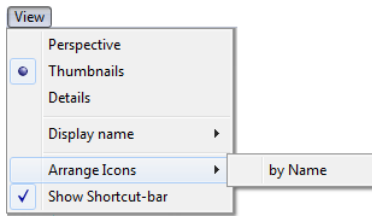

VISION6	VISION7	TAB	VISION7 TEACHER GUIDANCE NOTES
 Live Supervision	 Classroom Monitor	Home	Monitor Classroom Computers View classroom computers in a separate window with extended options for monitoring activity.
 Supervision	 Live View	Home	Start Live View Start supervising the selected computer in a separate window.
 Stop modes	 Stop	Home	Stop Function Stop all or stop the selected function, for example a demo you are running or a remote control session you have with a student computer.
 Request user name	 Request Name	Administration	Request Name Ask the student using the selected computer to type his or her name in the dialog box that opens.
 Shutdown	 Shut Down	Administration	Shut Down Shut down all computers in the classroom.
 App-Control	 Start Application	Home	Start an Application on Student Computers Select a program that you have on your computer and start it on all computers in the classroom.
App-Control > Run	Start Application > Run Application	Home	Run an Application on Student Computers Run an application or open a Web site on student computers by dragging a shortcut from the Start menu, or a Web address from a browser address bar, and then dropping it in the Open field.
App-Control > Share Document	 Show Document	Home	Open a Document on Student Computers Select a document on your own computer and open it on all computers in the classroom. Once shared, students have their own independent copy of the document to modify and save.

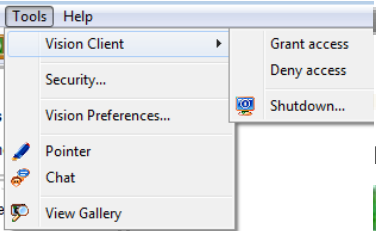

VISION6	VISION7	TAB	VISION7 TEACHER GUIDANCE NOTES
App-Control > Close All Applications	 Stop All Applications	Home	<p>Stop All Applications</p> <p>Stop all applications that are currently running on the classroom computers.</p> <p>Note: If one or more student computers are selected, applications are only stopped on those computers.</p>
App-Control > Manage Application List	 Manage Applications	Home	<p>Add Applications to your Favorites List</p> <p>Add applications that you frequently use to the Applications list.</p> <p>Next time you want to start an application on student computers, you can just select it from the list. This makes it easier and quicker to start the applications when you need them.</p> <p>To prevent students from closing the application you start or from working with other applications, start the application in Kiosk mode.</p>
 Surf-Lock	 Filter Web	Home	<p>Filter Web</p> <p>Apply an Internet access filter on all classroom computers.</p> <p>Filters are created using Manage Site Filters.</p> <p>When a filter is applied, the classroom computers only have access to the Internet sites defined in the filter; access to all other sites is denied.</p>
Surf-Lock > Lock Internet	 Lock Web	Home	<p>Lock Web</p> <p>Block access to the Internet on all classroom computers.</p> <p>Note: If one or more student computers are selected, only those computers are locked.</p>
Surf-Lock > Apply All Site List	Filter Web > Apply All Site Filters	Home	<p>Apply All Site Filters</p> <p>Allow classroom computers to access the Internet sites defined in the filters created.</p> <p>Access is blocked to all other Internet sites.</p> <p>Note: If one or more student computers are selected, only those computers have filters applied.</p>

VISION6	VISION7	TAB	VISION7 TEACHER GUIDANCE NOTES
Surf-Lock > Release All Site List	Filter Web > Clear Site Filter Selection	Home	Clear Site Filter Selection Remove all Internet access restriction on classroom computers.
Surf-Lock > Site List Manager	Filter Web > Manage Site Filters	Home	Manage Site Filters Create lists of Internet sites that classroom computers are allowed to access. When a filter is subsequently applied, access to all other sites is blocked.
 Pointer	 Pointer	Home	Use Drawing Tools to Highlight Areas on Your Screen Use arrows, highlighters and shapes to draw attention to areas of your screen during demonstrations. You can also zoom in and magnify any part of your screen or spotlight a particular object while the rest of the screen is dimmed.
 Snap	 Snapshot	View	Snapshot Create a screenshot of the full screen, a window or of an area of the application. If you have a Webcam connected to your computer, you can also take a photograph using the camera.
 Snap Viewer	 Snap Viewer	Home	Show Screenshots on Student Computers Start Snap Viewer on all student computers to show any screenshots you take using Snapshot . Students can right-click each screenshot thumbnail to see the screenshot in normal size or in full screen, and to copy, save or print the screenshot. Click Snap Viewer to close it again on student computers.
 Chat	 Chat	View	Chat Open Chat and start interacting with students in your classroom. You can send text messages, run poll based questionnaires and exchange files with computers in your classroom.
 Properties	 Edit Details	Administration	Edit Student Computer Information View technical information about the selected computer, including operating system version and Vision version, and add custom information about the computer.
