

Netop Remote Control Quick Installation Guide (EN)

Article Number: 108 | Last Updated: Wed, Sep 27, 2017 7:44 AM

Netop Remote Control consists of two basic modules: Netop Guest running on one computer can connect to Netop Host running on another computer to remote control the Host computer.

Install Netop Guest on computers that will be remote controlling and Netop Host on the computer to be controlled remotely. The Netop Remote Control modules are installed from the Downloads section on the Netop site.
