

Installation script sample

Article Number: 127 | Last Updated: Wed, Jul 12, 2017 12:35 PM

After creating the MST package using Netop Pack'n Deploy, you may use a script to install the Host or Guest. Launch a Command Prompt (Run As Administrator):

For the Netop® **Host** use:

```
msiexec /i NetopRemoteControlHost_UK.msi TRANSFORMS=NetopRemoteControlHost_UK.mst /qn
```

For the Netop **Guest** use:

```
msiexec /i NetopRemoteControlGuest_UK.msi TRANSFORMS=NetopRemoteControlGuest_UK.mst /qn
```
