

License Error: This limit has been exceeded. Please contact your supplier to obtain additional licenses.

Article Number: 129 | Last Updated: Wed, Sep 5, 2012 6:22 PM

If you receive a message upon the startup of a Netop module that indicates you have exceeded your license limit, this license is installed and is already in use (currently running) on as many computers as it is licensed for on your network.

The message will indicate the module name and the quantity.

Sample error message:

"This program is licensed to run on 1 Host(s). This limit has been exceeded. Please contact your supplier to obtain additional licenses."

Check your computers for installations of the module and verify the license in use by going to the Help>About Netop installation and compare it to other installations. It is recommended that you uninstall Netop modules on computers that are not used for the module.
