

Demoing Microsoft Photostory causes Vision teacher to restart

Article Number: 160 | Last Updated: Wed, Sep 23, 2015 1:30 PM

Applies to: Visions version 6.0 or higher, Vision Pro 7.3 or higher

When you attempt to demo a Microsoft Photostory window it causes Windows to initiate a blue screen and then generally, depending on the computer settings, restart. Usually this is fast enough you do not see the blue screen.

This is a known issue in Vision and cannot be resolved without it being addressed in a future version. We do not currently have a timeline to provide for this issue to be addressed.
