How to set up Simple Network Management Protocol (SNMP) for Netop Remote Control

Article Number: 414 | Last Updated: Tue, Jan 31, 2017 1:20 PM

In Netop Remote Control all the log events are implemented as possible SNMP traps. Netop uses the Standard Wind
SNMP service. They are selectable from the event dialog as the other event types (log locally on a file, log server file
Windows event log).
