WebConnect 3 Migration Guide (EN)

Article Number: 443 | Last Updated: Fri, Nov 15, 2019 3:24 PM

The **Netop WebConnect** 3 service is a highly secure web-based solution consisting of a **Connection Manager** that serves as a meeting hub for the **Netop Guests** and **Hosts**, and at least one **Connection Server** that routes the traffic between the **Guests** and the **Hosts**. The **Connection Server** is an extended **Host**. This is available as an on premise application. Using the **Netop WebConnect 3** service, users can remote control computers without having to configure firewalls and routers.
