Netop Security Server Installation on Win Server2012 using RDS (EN)

Article Number: 458 | Last Updated: Wed, May 17, 2017 11:07 AM

This document attached below provides Netop Remote Control customers directions on how to install and maintain Netop Security Server (NSS) instances using Remote Desktop Protocol (RDP).

This guide anticipates the Netop Security Server to operate in a Windows domain and to handle permissions related to domain users and groups as well as computers, computer groups and Organizational Units.
