Netop OnDemand on Windows XP/Vista

Article Number: 460 | Last Updated: Mon, Jun 12, 2017 11:23 AM

Starting with version 3.0 (build 2016217) of the Netop OnDemand Pack'nDeploy, both the Pack'nDeploy application itself, as well as the NOD Hosts generated from it, only run on Windows 7 and higher.

If you want to use Netop OnDemand (Pack'nDeploy or the NOD Host) on a Windows XP or Windows Vista machine, please use the Netop OnDemand Pack'nDeploy version 3.01 build 2017158, specifically including support for these operating systems, along with all other operating systems supported by the official version. It can be downloaded from [here](#).
