

## Netop Vision7 Improving User Interface and Workflow (EN, DE)

Article Number: 47 | Last Updated: Mon, Dec 3, 2012 8:37 PM

Applies to: **Vision 7 all versions** In the planning phases for the next major release, the Netop Vision team reviewed the user interface and the way our users, primarily school teachers but also IT Administrators, interact with Vision. We wanted to make Netop Vision easier and more satisfying to work with by improving the user interface and the workflow in Vision. We also wanted to ensure that Netop Vision remains the efficient classroom management solution that it has been for a number of years. This document describes the new user interface and the ideas and goals that informed the design. The target audience is the Netop Vision user who is familiar with Vision6 or earlier versions. However, new Netop Vision users might benefit from learning about the ideas behind Vision7 as well.
