

## Vision for Chromebooks URL requirements

Article Number: 472 | Last Updated: Mon, May 6, 2019 9:37 PM

Applies to: Vision for Chromebooks The following URLs need to be accessible for Vision for Chromebooks to function correctly: `stun:stun.l.google.com:19302`

`visioncos*.netop.com` (the \* is a wildcard for a session ID, many users can't put wildcards in their filters so just allowing `netop.com` usually covers it)

<https://www.googleapis.com>

<https://accounts.google.com>

<https://accounts.google.com/accountchooser>

<https://accounts.youtube.com>

<http://www.google.com/favicon.ico> Note: These are not all URLs you can go to, some of them are just there to give access to the protocols needed at a given URL.
