

Migration from the Chrome apps to the native apps

Article Number: 484 | Last Updated: Wed, Jul 18, 2018 9:58 AM

Description Google has announced that it will phase out the Chrome apps on all platforms except for Chrome OS. The announcement is available [here](#) . It seems that sometimes in 2018, the support will be removed. The Teacher application is a Chrome app. Therefore, we have created a replacement of the app for the users who use Windows. We will not remove support from the existing Teacher app, but Google will stop making it available at a certain point. Therefore we strongly recommend moving to the new native Teacher app for Windows. **How to migrate Teachers working on Windows** On your Windows machine download and install the application from the links below (System requirements are available [here](#)): Microsoft Store - go to store [here](#) .EXE files 32 bit “ download [here](#) 64 bit “ download [here](#) .MSI files (for mass deployment only) 32 bit “ download [here](#) 64 bit “ download [here](#) Once installed, launch the **Vision Teacher for Chromebooks** application and login using your regular G Suite user. The experience is similar to the Chrome app. **Please provide us feedback on the new Teacher app [here](#) .** **Teachers working on macOS** On your Mac machine download and install the application from [here](#) . Once installed, launch the **Vision Teacher for Chromebooks** application and login using your regular G Suite user. The experience is similar to the Chrome app. **Please provide us feedback on the new Teacher app [here](#) .** **Teachers working on Chrome OS** No change is required on Chrome OS. The application is still available as a Chrome app (same [link](#)).
