

Vision add student computers screen displays no devices to add to the classroom.

Article Number: 506 | Last Updated: Thu, Aug 15, 2019 5:38 PM

Applies to: Vision All versions, Vision Pro all versions In Windows 10 version 1709 Microsoft disabled the service Microsoft Network Discovery service that computers use to build a list of devices on their network to stop working. A version was updated our list no longer populates. A A You can see more information at this article as to why they disabled https://social.technet.microsoft.com/Forums/en-US/f0a9ad80-d940-4483-818b-ec943f1dc420/network-discovery-not-working A

There is an alternative way to add devices to your classroom that does not require the service they disabled. When you are in the class, there is an add button. A If you click it you can manually input student device names in the input box that comes up (you wish to add multiple at the same time) and this will add them to the class.

A Once you have added students to your classroom, regardless of the method you used to add them, Vision should pop up a message you used. A
