

Netop Remote Control My Mobile Devices

Article Number: 508 | Last Updated: Thu, Jun 24, 2021 12:03 PM

This is a list of supported mobile devices in the Netop Remote Control Portal. **Android Host**

requirements **Android version 10, 9, 8, 7, 6, 5, 4.** **even v.2.3** The Host module supports devices that run Android version 9, 8, 7, 6, 5, 4.x as well as devices running the older Android 2.3 versions. The Host is available as an **.APK** package for installation directly on the Android device or as an **.MSI** package for installation via a PC. If you download the **.MSI** installation package, you receive the Mobile Host Manager, a Windows PC program for easy configuration of the configuration settings available for the Android Host module. During the installation and start of the Host, Android may ask permission for the Host to access various resources. The user must provide such permission. The Host may also require that a WiseMo add-on module is downloaded and installed. Such a module can be necessary to allow remote desktop control of the device. Devices where remote desktop control (screen and input) is possible:

- All Samsung devices running Android 4.0 or above
- Some Samsung devices running Android 2.3
- LG devices, Lenovo Tablets, Honeywell, ECOM Logic instruments
- Sony Xperia S devices and Xperia devices released until the end of 2018 (no plugin necessary)
- Zebra devices that support the Zebra Mobility Extensions (MX) framework 8.3 or better (no plugin necessary)
- Archos, Mitac, Fieldbook, Hanspree, eWave, and many more
- Devices that are rooted
- Other devices, where the Host can access the necessary system resources

Screen viewing is possible for all devices running Android 5 or later. To download the Host, click [here](#).

Win Mobile / CE

requirements The packages are available as a **.CAB** package for installation directly on the Mobile device and also as an **.MSI** package for installation via a Windows PC. The **.MSI** installation file includes the Mobile Host Manager, a Windows PC program for configuration of the Mobile Host module.

Standard distribution packages

- Windows Embedded Compact 2013, CE 8, for ARM, PXA, Cortex, Intel x86
- Windows CE 5, CE 6 and Embedded Compact 7 for ARM, PXA, Cortex, Intel x86
