

How to Favorite your most used Web Filter

Article Number: 519 | Last Updated: Thu, Feb 20, 2020 4:34 PM

Applies to: Vision for Chromebooks How do I favorite my most used Web Filters so I don't have to scroll to the bottom of the list to find the one I use the most often? There are two ways to mark a web filter as a favorite. This allows you to quickly access your most used Web Filter.Â First Method:

Launch the Vision Teacher Application

Sign In

Click the vertical ellipsis in the upper right corner

Select Configure Web Filter

On the next screen you will see your list of created Web Filters. Next to the toggle to turn the Web Filter on/off, there is a star. Initially it will be unshaded.Â

Select the Web Filter list you want to 'Favorite' by selecting the star to the left of the on/off toggle. This will move the 'Favorited' list to the top of your Web Filter list.

There is no need to click 'Save' as it automatically saves this selection. To move back to the classroom screen, click the back arrow in the top left corner.Â Second Method:

Log Out of Vision Teacher. With Filter Web turned on, students will only have access to the links in the lists that you enable here. You may add, edit or delete lists and configure even [more settings](#) from your web browser.

Enter your Google or Clever credentials
